SUMMARY

Senior React Native and frontend developer with 4+ years building iOS, Android, and web products in TypeScript. Writes native Swift and Kotlin modules, has shipped 10+ apps to the App Store and Google Play, and maintains six open-source React Native packages.

EXPERIENCE

TGC Amman, Jordan
Senior React Native & Frontend Developer Aug 2026 – Present

- Develop Aleena, a fashion commerce platform, across a React Native (Expo) mobile app, a Next.js storefront, and an admin dashboard in a shared Turborepo monorepo.
- Build native iOS (Swift) and Android (Kotlin) integrations: Apple Pay with PassKit, animated launch sequences, camera hardware controls, seasonal app icons, and Android predictive-back gestures.
- Implement runtime Arabic/English (RTL/LTR) switching without an app restart, Shopify customer authentication with OAuth PKCE, and MMKV-backed TanStack Query hydration for an instant first render.
- Create five shared packages (storefront, UI, theme, localization, configuration) that also power the dashboard's live CMS preview.

Digital Gates Amman, Jordan
Mobile Developer (React Native) Jun 2025 – Aug 2026

- Developed the Speedy Hire mobile app for iOS and Android in React Native and TypeScript for a UK equipment-hire client, from project setup through App Store and Google Play releases.
- Delivered live order tracking on Google Maps, off-hire and collection requests, invoices and online payments, a depot finder, and checkout with address management.
- Built QR and barcode asset inspection with VisionCamera, biometric login, and Azure AD B2C OAuth with secure token storage.
- Wrote native modules for splash-screen animation and in-app restart, added dark mode with Unistyles, upgraded React Native from 0.81 to 0.85, and automated builds with Azure Pipelines and fastlane.
- Interviewed mid-level and junior candidates for mobile roles.

We The Makers Amman, Jordan
Full-Stack Software Developer Nov 2023 – Jun 2025

- Led and mentored the mobile team, setting code-review standards, branching strategy, and architecture decisions across concurrent client projects.
- Shipped React Native and Next.js products in fintech, delivery, loyalty, and automotive with offline support, push notifications, and bilingual Arabic/English RTL interfaces.
- Raised Lighthouse scores with Next.js ISR, image optimization, and bundle analysis; built GitHub Actions CI/CD pipelines for build, test, and deployment.

ASAC (Abdul Aziz Al Ghurair School of Advanced Computing) Amman, Jordan
Full-Stack JavaScript Trainee Dec 2022 – Oct 2023

- Built REST APIs with Node.js and Express and front ends with React in an intensive full-stack program.

OPEN SOURCE & PROJECTS

- **react-native-nitro-theme-transition**: 16 native theme-change animations on Nitro Modules (Swift, Kotlin, Core Animation), no Skia needed.
- **react-native-rtl**: Runtime LTR/RTL switching for Fabric apps and native navigation chrome, with no restart.
- **react-native-silk-text, splash-flow, parallax-flow, pull-flow**: Native text animation (SwiftUI, Jetpack Compose), animated splash screens with an Expo plugin, parallax, and pull-to-refresh.
- **Balsam United**: Rebuilt a healthcare React Native app in 3 weeks vs. a projected 6 months; shipped to both stores.
- **MacHarmony**: SwiftUI macOS app with Stripe, Supabase auth, device-bound licensing, and Sparkle updates.
